

GitHub Actions

Michael Long

Agenda:

- Introduction
- Workflow Overview
- Examples/How-to
- Summary
- Tools and References

Why GitHub Actions?

- > Event driven
- > Easier automation
- > Highly customizable
- > Directly from repo
- > Applied at any stage in GitHub workflow

Workflow Overview

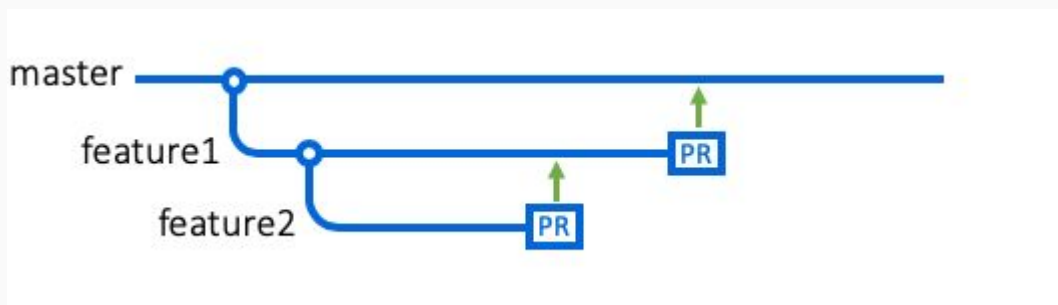

- > Event triggers *workflow*
- > *Workflow* contains a *job*
- > *Runner* listens for *jobs*
- > *Jobs* use *steps* to control order of *actions*
- > *Actions* are commands

Examples

- > on: pull_request
- > on: pull_request_comment
- > on: pull_request_review
- > on: issue comment
- > on: page_build
- > on: push
- > on: check_suite
- > on: delete

Summary:

- GitHub Actions Overview
- Why GitHub Actions?
- Workflow Overview
- Example Events
